OMRON

Vision Accessory Catalog

realizing

Best Solutions for Quality Inspection and Control

With a complete line-up of Lights and Lenses, advanced Vision Sensors, and 30 years of vision solutions knowhow, OMRON provides solutions to maintain your quality, increase the precision of your machines, and reduce your implementation costs.

OMRON's unique Camera-mount Lighting Controller helps reduce your implementation costs by reducing wiring work, saving space in the control panel, and easily setting luminance control without programming.

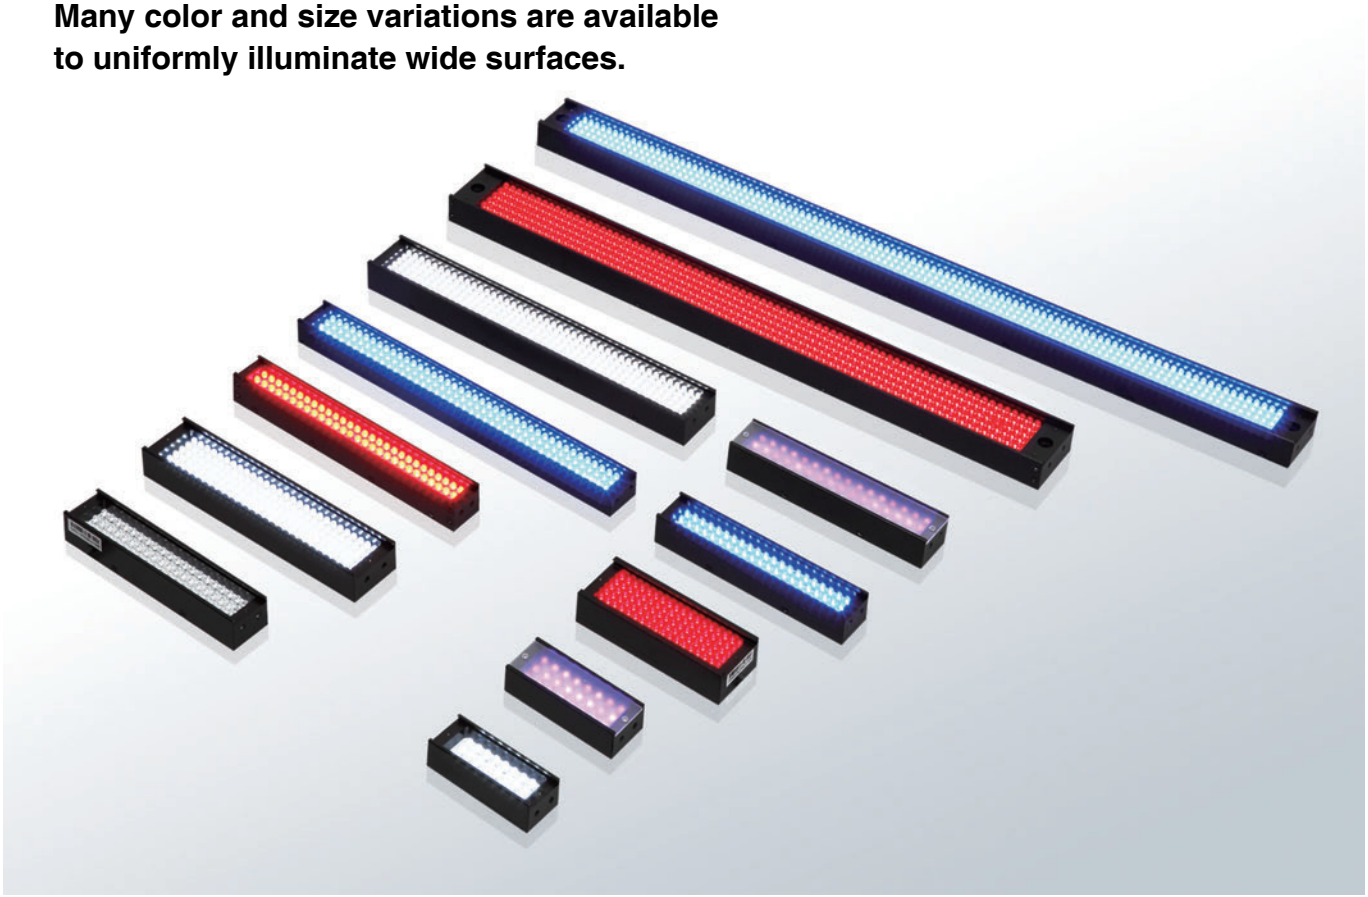
High-brightness LED Lights

Lens

Bar Light

FLV-BR Series

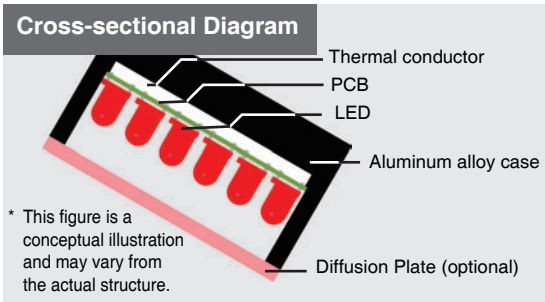
Many color and size variations are available to uniformly illuminate wide surfaces.



Product Features

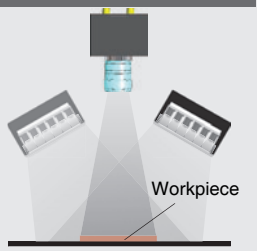
- Ideal for illumination of wide, rectangular surfaces.
- Many color and size variations.

Cross-sectional Diagram



* This figure is a conceptual illustration and may vary from the actual structure.

Illustration of Illumination

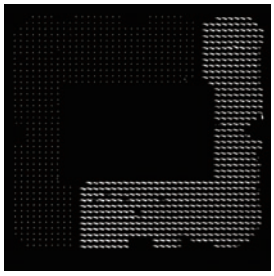


Applications

- Detection of metal surfaces
- Detection of cracks on surfaces
- Detection of LCD panels

Positioning of LED Packages

Detection of Faulty LGA Electrodes



Detection of Printed Logo Marks and Characters on Long Workpieces

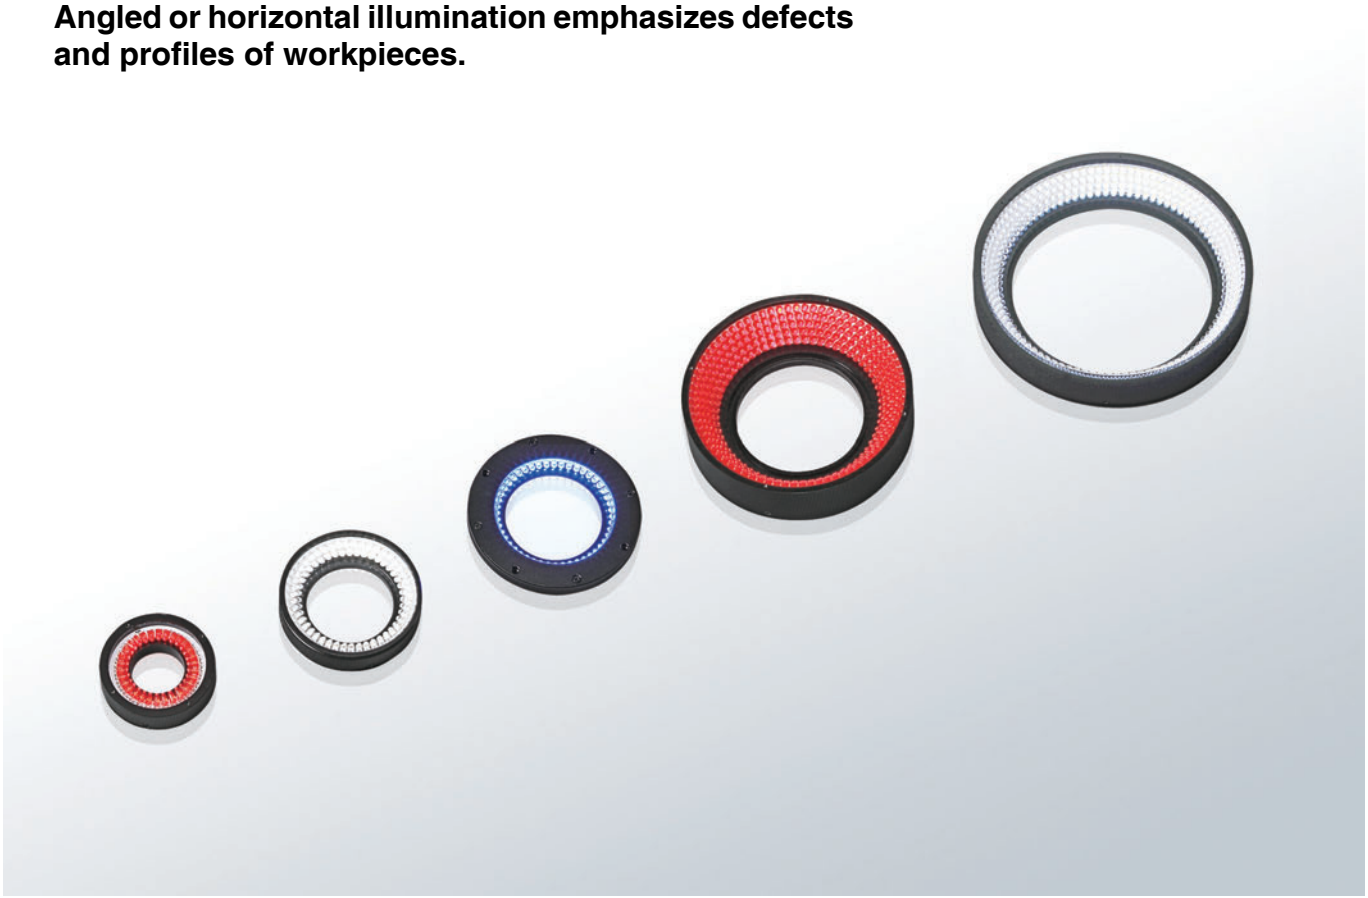
Low Angle Ring Light

FLV-DL Series

Angled or horizontal illumination emphasizes defects and profiles of workpieces.



Product Features

- Bright illumination with high-density LED arrays.
- Compact designs that save installation space.
- Optional Diffusion Plates for uniform illumination.

Cross-sectional Diagram

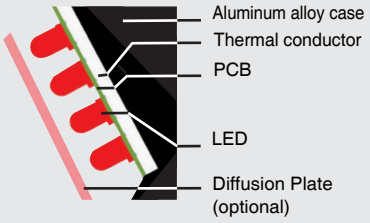


Illustration of Illumination

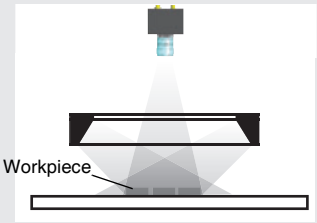

* This figure is a conceptual illustration and may vary from the actual structure.

Applications

- Detection of marking and defects on surfaces of metal workpieces
- Detection of foreign matter in medicines
- Detection of chips on circumference of O rings

Surface and profile inspection of metal workpieces

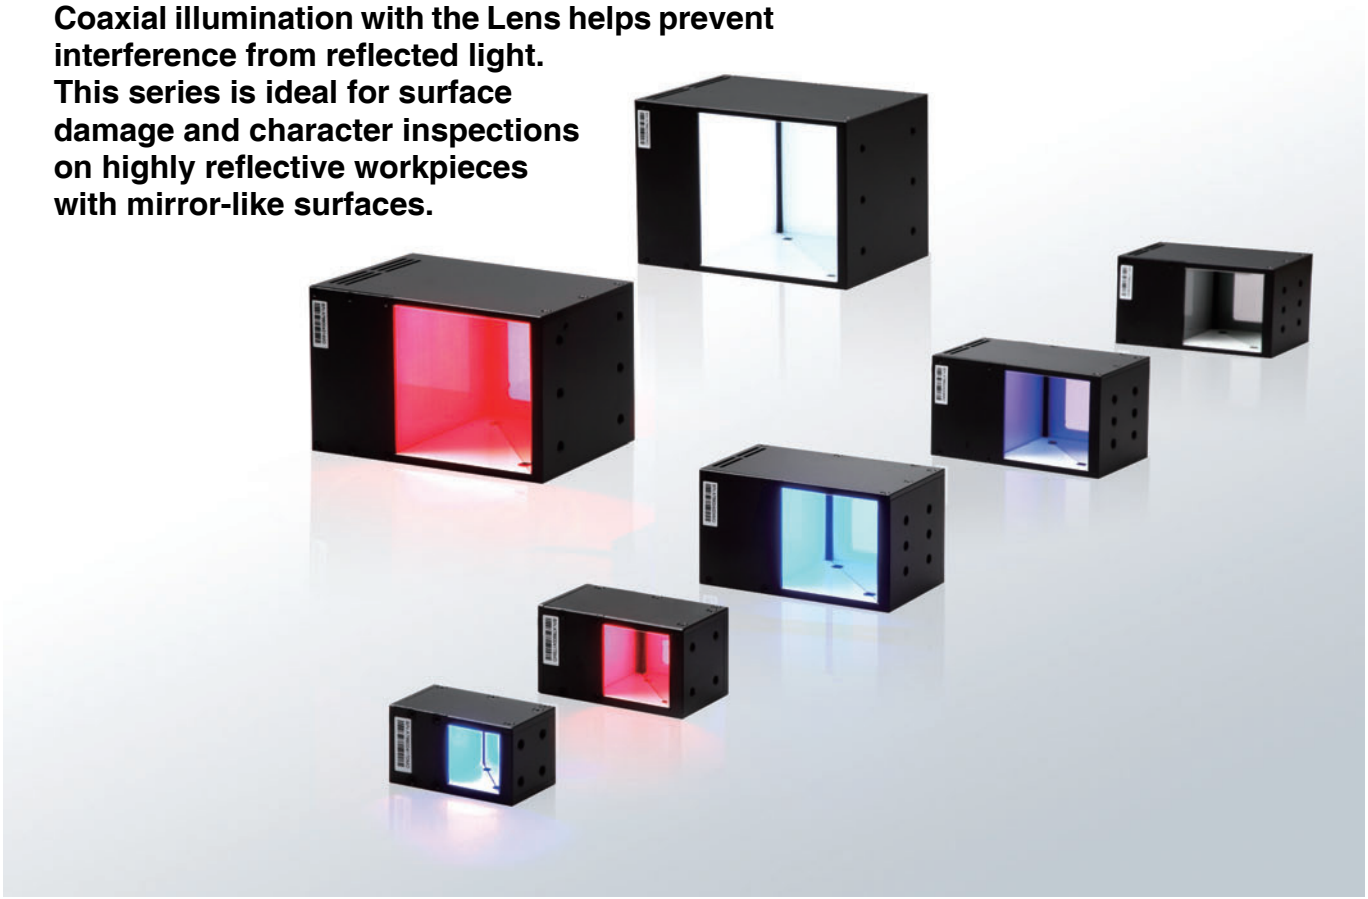
Coaxial Light

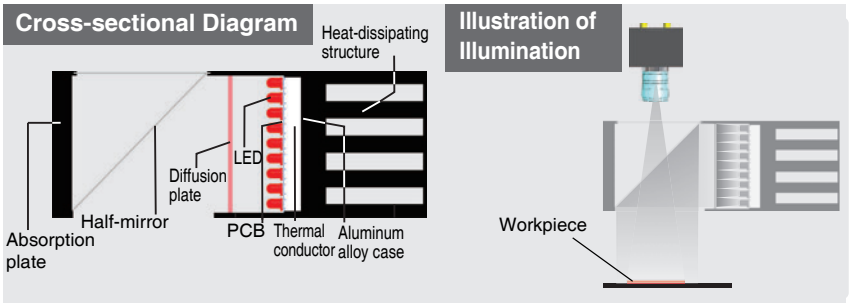
FLV-CL Series

Coaxial illumination with the Lens helps prevent interference from reflected light. This series is ideal for surface damage and character inspections on highly reflective workpieces with mirror-like surfaces.



Product Features

- Long life and stability result from a structure with optimum heat dissipation.
- Uniform illumination for clear images.

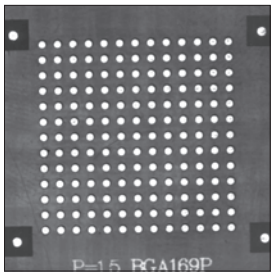


* This figure is a conceptual illustration and may vary from the actual structure.

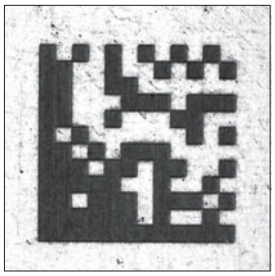
Applications

- Inspection for scratches on highly reflective surfaces
- Inspection for damages on chips and silicon wafers
- Detection of positioning marks
- Recognition of bar codes on packages
- Recognition of laser-marked characters and 2D DMP codes
- General exterior detection

BGA Inspection



Recognition of 2D DPM Code



Positioning for Metal Welding

Shadowless Low Angle Ring Light

FLV-FP Series

**This series achieves highly uniform illumination across a wide field of view.
Excellent symmetry eliminates diagonal shadows.**

Product Features

- Shadowless Ring Lighting
- Achieve highly uniform illumination and obtain different images at different installation distances for a much wider range of application compared to normal ring lighting.

Cross-sectional Diagram | **Illustration of Illumination**

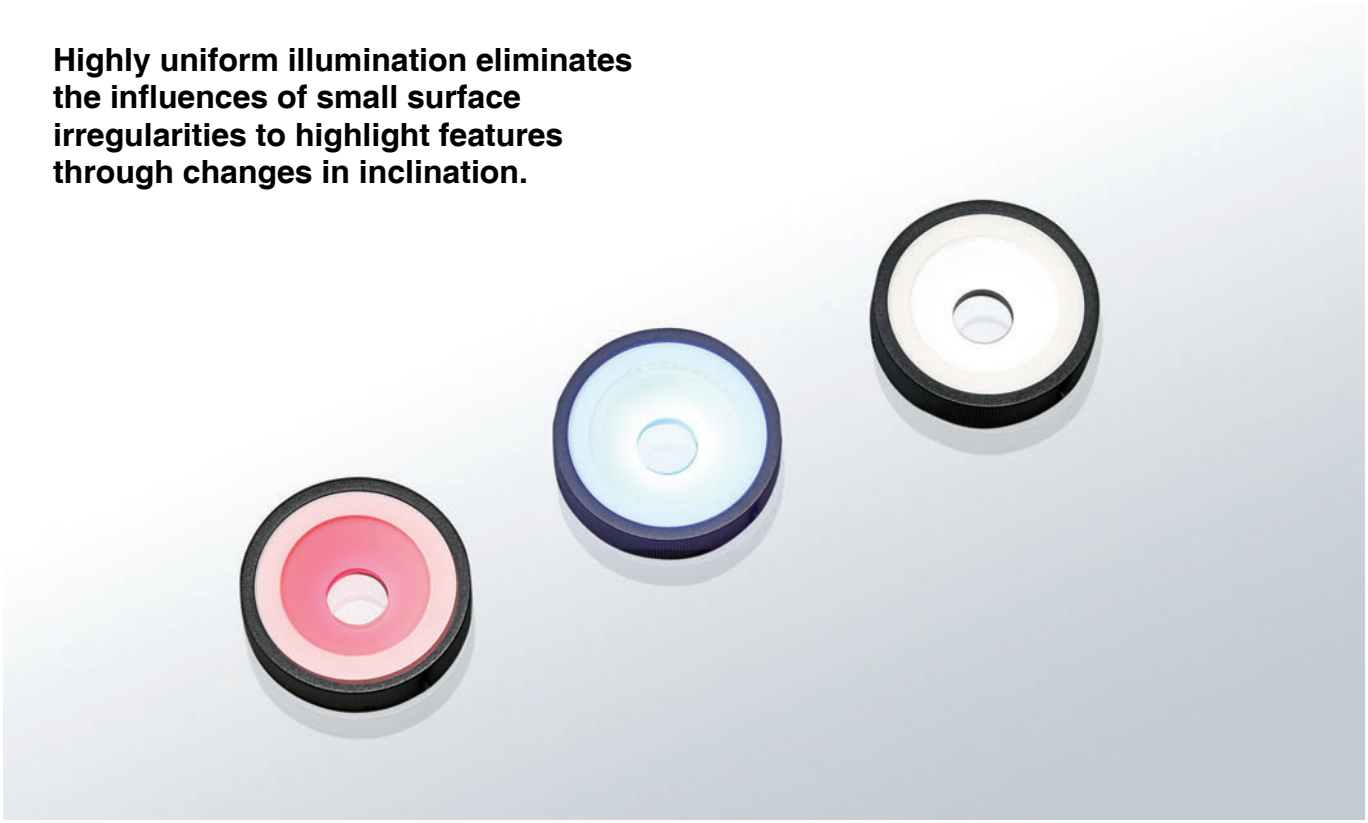
Shadowless Dome Ring Light

FLV-FS Series

Highly uniform illumination eliminates the influences of small surface irregularities to highlight features through changes in inclination.



Product Features

- Uniquely designed diffusion plate achieve highly uniform illumination through reflection and diffusion.
- Eliminates the influences of small surface irregularities to highlight features through large differences in inclination.
- Saves space for small workpieces while achieving the benefits of dome lighting.

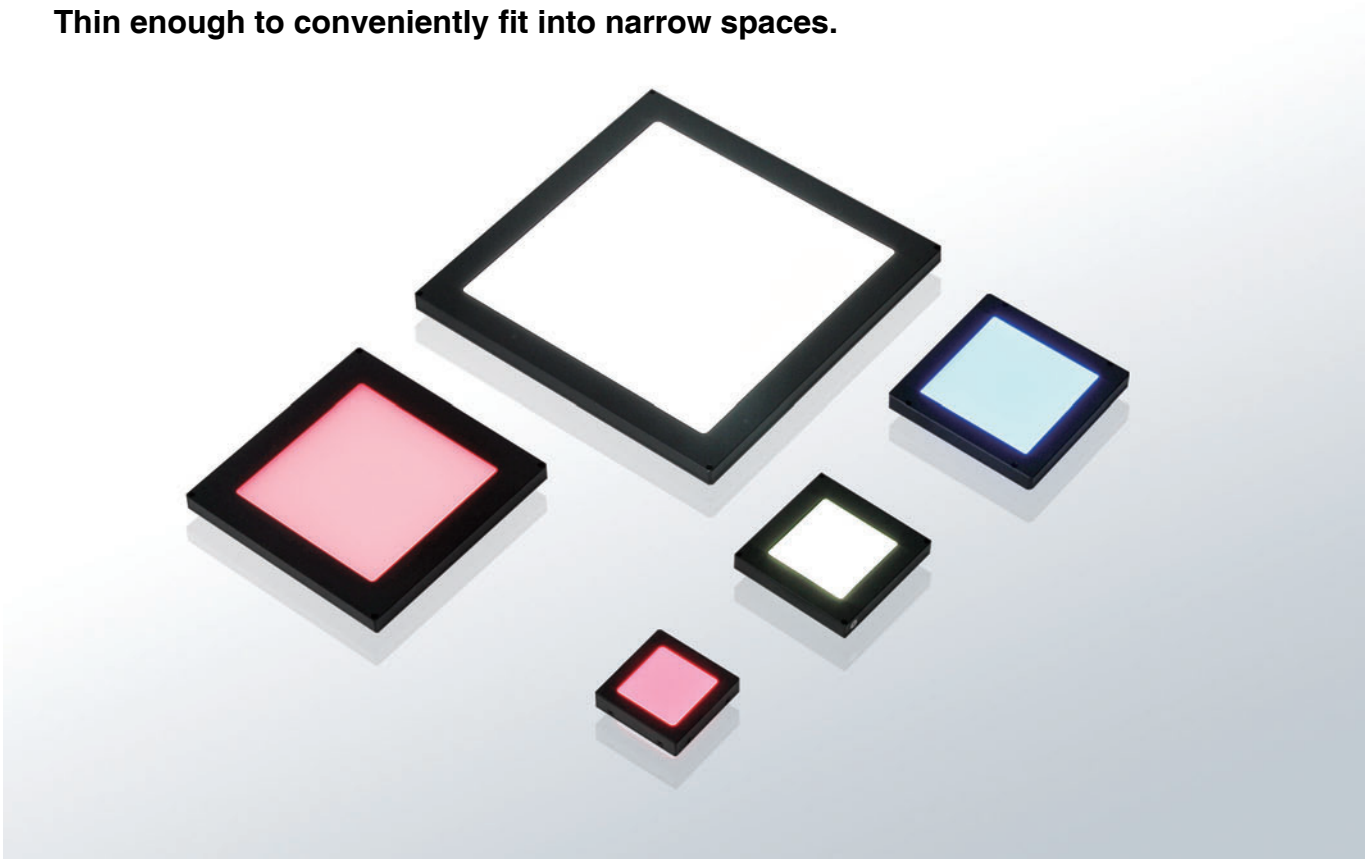
Edge Type Light

FLV-FB Series

Ultrathin, Highly Uniform Backlights
Thin enough to conveniently fit into narrow spaces.



Product Features

- Five size variations with emitting surfaces from 35 mm square to 164 mm square.
- As thin as 8 mm (FLV-FB7070).

Cross-sectional Diagram

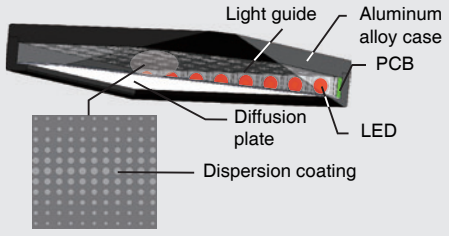


Illustration of Illumination

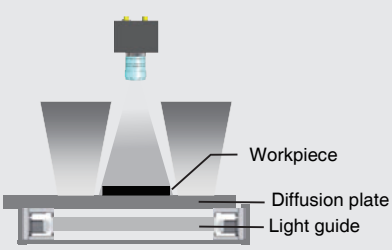

* This figure is a conceptual illustration and may vary from the actual structure.

Applications

- Detection and size measurements of electronic devices
- Detection of LCD dead pixels

Detection of Silkscreen Patterns on Cell Phone PCBs

Edge Type Coaxial Light

FLV-FX Series

This series features a wide range of applications with many effects, such as backlighting and coaxial lighting.

Product Features

- High uniformity with diffused illumination.
- Achieves both shadowless and coaxial illumination.
- Lightweight and compact to conveniently fit into narrow spaces

Cross-sectional Diagram

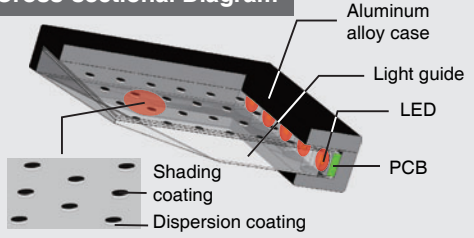

Illustration of Illumination

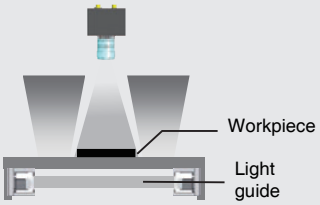


* This figure is a conceptual illustration and may vary from the actual structure.

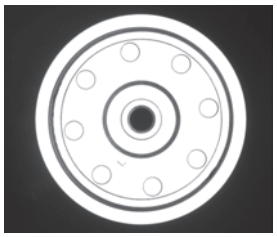
Applications

Package inspections for foodstuffs, cigarettes, and household chemicals

Appearance inspections of home appliance cases and com ponents

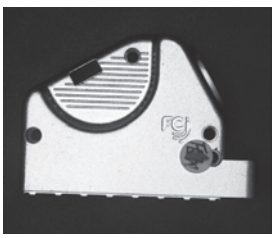
Detection, measurement, and recognition of characters and figures on highly reflective, uneven surfaces

Detection of Mounting Hole Positions



Inspections for Defects on Metal Parts

Inspections for Defects on Plated Parts



Recognition of Metal Characters and Patterns on Plastic Surfaces

Dome Light

FLV-DD Series

Uniform Illumination from All Directions
This series produces shadowless images of the entire workpiece.

Product Features

- Achieves uniform illumination by reflecting light from a ring-shaped light source through a highly reflective, diffusion dome.

Cross-sectional Diagram

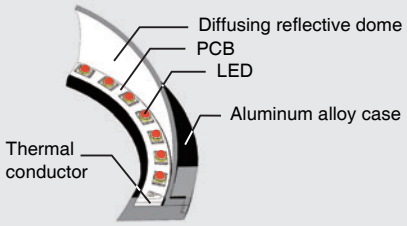

Illustration of Illumination

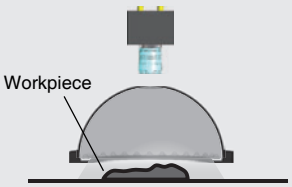


* This figure is a conceptual illustration and may vary from the actual structure.

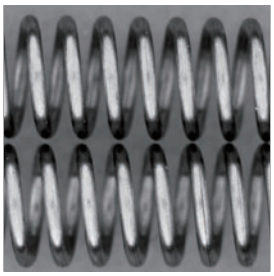
Applications

- Detection of characters and marks on curved or uneven surfaces
- Detection of highly reflective surfaces, such as metal or glass
- Shape measurements of curvedor uneven workpieces

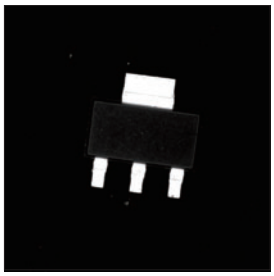
Inspection of Date Characters on Drink Cans

Detection of Characters on Cell Phones

Detection of Cracks on Spring Surfaces



Inspection of IC Pins



Scratch Detection on Metal Bars

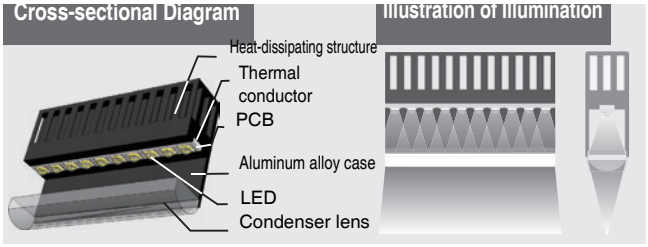
Line Light

FLV-LN Series

Exceptionally Bright, Highly Uniform Line Lighting
This series is ideal for high-speed processing with line cameras.

Product Features

- Extremely high brightness
- Achieves highly effective line illumination with a condenser lens.



* This figure is a conceptual illustration and may vary from the actual structure.

Applications

Printing inspections
Sheet inspections
Detection of film and glass surface damage and internal impurities

Camera-mount Lighting Controller for FLV Series

FLV-TCC Series

Compact Lighting Controller
Mounts directly onto the FH/FZ OMRON Cameras
Multistage Control of Lighting on Up to Four Lights can be connected.

Product Features

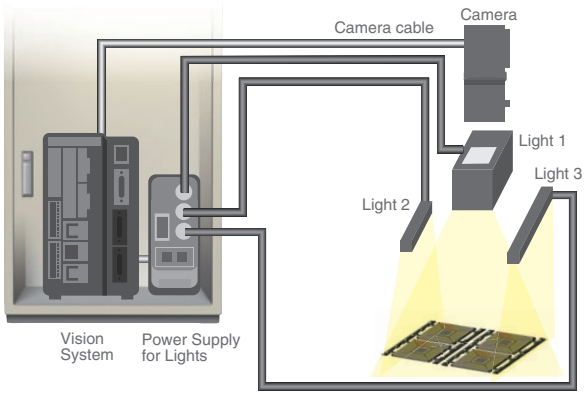
- Saves space with its compact design.
- No need for space in control panels for expansion.
- Maintains Lighting intensity even when located at long distances.
- Light intensity and luminance control are set through the Vision System.

● Simple wiring and space saving

Wiring from the control panel to remote Cameras and Lights is simplified.
The more Cameras and Lights are connected to the Vision System Controller, the more effective in simplifying wiring and saving space.

Standard Lighting System

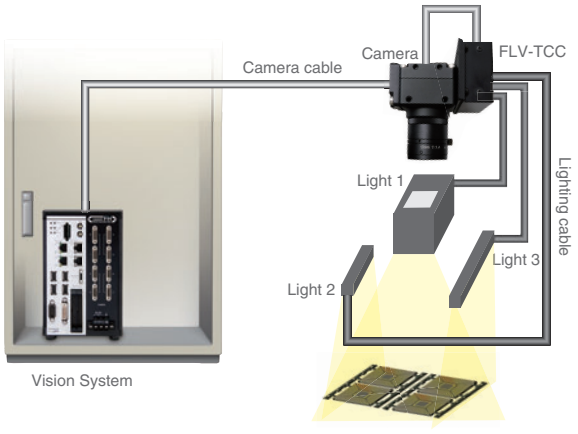
· Complicated wiring from the control panel to the Lights and Camera is required.
· Space to install the Power Supply for Lights in the control panel is required.



Camera cable + lighting cables are wired from control panel

FLV-TCC Series

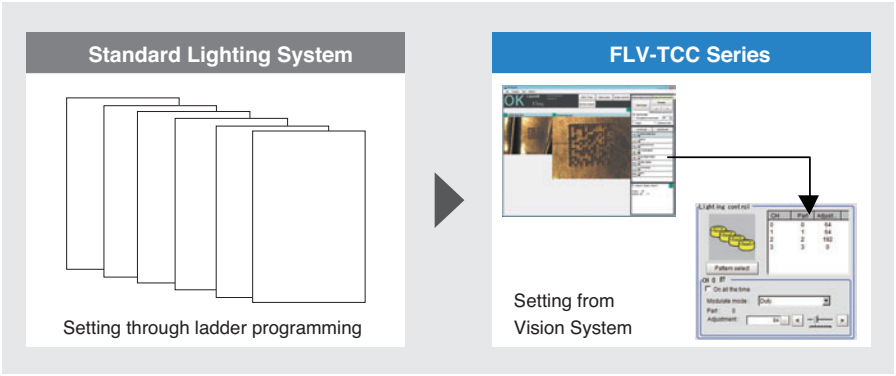
· Power supplied from the Camera eliminates the need for complicated wiring from the control panel to the Lights.
· The compact design that enables mounting onto the Camera saves space in the control panel.



Only the camera cable is connected from control panel

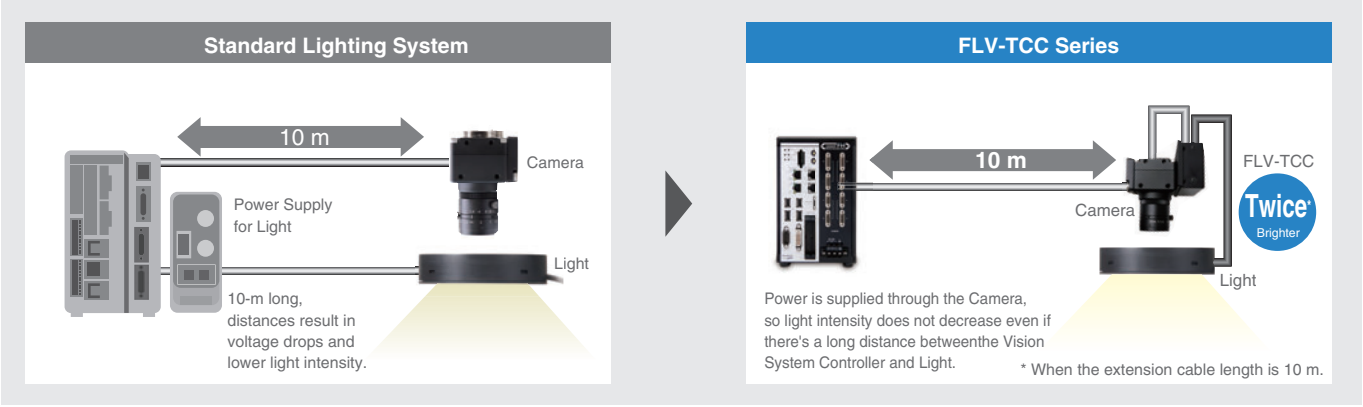
●Easy control setting

Light intensity and luminance control can be set from the flow menu of the Vision System Controller. No need of ladder programming to create light sequence or communications settings.



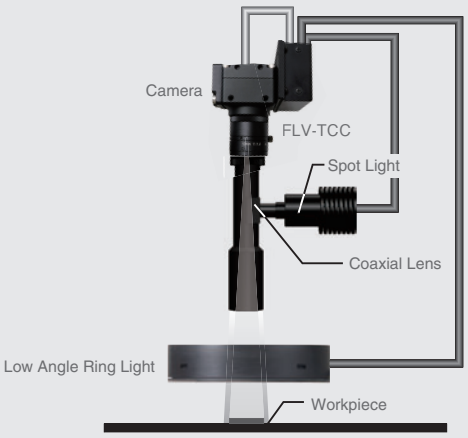
●Maintaining light intensity even with long wiring distances

Even if the Vision System Controller and Light are separated by a long distance, the light intensity is maintained due to power being supplied through the Camera. This means that it is not required to increase light intensity and power consumption for high-speed production lines.



●Connecting Spot Light

The new FLV-TCC□EP can be connected with a Spot Light, and the hybrid type FLV-TCC□HB can be connected with up to two Standard Lights and a Spot Light. Applications such as alignment and cosmetic inspection of small electronic parts, e.g. connectors and IC's, require these kind of Lighting Controllers using Spot Lights.



Ordering Information

Model	Number of Channels	Applicable Lighting *5			Power Supply Voltage	Maximum Lighting power	Luminance Control Method
		Standard Light FLV Series*1	Spot Light FLV-EP Series	Line Light FLV-LN Series			
FLV-TCC4	4 standard lights	○	×	×	24 VDC *2	15 W max.*3	Digital *4
FLV-TCC1	1 standard light	○	×	×			
FLV-TCC3HB	1 Spot Light and 2 standard lights	○	○	×			
FLV-TCC1EP	1 Spot Light	×	○	×	—	Any FLV-EP-series Spot Light can be connected	

*1. Standard light means all FLV-series Lights excluding the FLV-EP-series Spot Lights and the FLV-LN-series Line Lights.
*2. If the total power consumption of Lights is 7.5 W or less, an external power supply is not required because the power is supplied from the Camera.
*3. Refer to the Specifications on page 34 for the details of "power for connectable lighting".
*4. Intensity is controlled through the settings of the Vision System Controller.
*5. ○:Connectable ×:Not connectable

Camera-mount Lighting Controller for FLV Series FLV-TCC Series

Drive method		Constant voltage method		0ch Constant current method 1ch/2ch: Constant voltage method	Constant current method
Lighting method		Trigger lighting, Continuous lighting			
Luminance Control Method		Duty light adjustment or voltage light adjustment Duty light adjustment: PWM frequency of 100 kHz, light adjustment of 255 levels Voltage light adjustment: Light adjustment of 255 levels (all are set with image sensor controller)		0ch Duty light adjustment or current light adjustment 1ch/2ch Duty light adjustment or voltage light adjustment Duty light adjustment: PWM frequency of 100 kHz, light adjustment of 255 levels current light adjustment/ Voltage light adjustment: Light adjustment of 255 levels (all are set with image sensor controller)	Duty light adjustment or current light adjustment Duty light adjustment: PWM frequency of 100 kHz, light adjustment of 255 levels current light adjustment: Light adjustment of 255 levels (all are set with image sensor controller)
Trigger lighting		Lighting in synchronization with trigger input timing from the controller.			
Trigger lighting delay time		Ton: 30μs max.			
Lighting duration setting		Auto setting in accordance with shutter speed.			
External Interface		Camera connection cable (directly connected with the main unit)			
Insulation Resistance		0.5 MΩ (100VDC)			
Ambient Temperature		Operating: 0 to +50°C, Storage: -15 to +60°C (with no icing or condensation)			
Ambient Humidity		Operating and storage: 35% to 85% (with no condensation)			
Degree of Protection		IP20 (IEC60529)			
Vibration Resistance(destructive)		10 to 150 Hz, (0.7mm double amplitude) 80 min each in X, Y, and Z directions			
Shock Resistance (destructive)		150 m/s² 3 times each in 6 directions(up/down, left/right, forward/backward)			
Materials		Case,Camera mount plate: Aluminum, Cable: FPVC			
Weight		Approx. 130g (including the camera mount plate)	Approx. 120g (including the camera mount plate)	Approx. 130g (including the camera mount plate)	Approx. 120g (including the camera mount plate)
Accessories		Instruction manual(this manual), Lighting connection table, Camera Mount plate, Mounting screws (M2 set screw x 4, M2 flat head screw x 4, M4 flat head screw x 4)			
Applicable standards		EN61326-1 *4			

*1. Check the lighting connection table of accessory.
*2. When mounting on model FH-S□12, use model FH-SM12-XLC (separate sale).
*3. When supplying the power to this product from an external input power supply (24V), make sure to turn ON the power to this product first or at the same time with the image sensor controller. If you reverse this order, this product will not recognize the 24V external input, so lighting greater than 7.5W will not be possible.
*4. Electromagnetic environment: Industrial electromagnetic environment (EN/IEC 61326-1 Table 2)
Also, the following condition is applied to the immunity test of this product.
There are case that Lighting brightness fluctuate Max 10%.

FLV Lighting connection table

Lighting controllers that can be connected to lighting equipment are shown below.

◎: Connectable, constant lighting possible ○: Connectable, only trigger lighting possible ×: Not connectable
The following table shows connection availability when connecting one piece of applicable lighting equipment to each lighting controller.
When connecting lighting equipment to multiple channels, check that the specifications of lighting electricity allowed for each lighting controller is satisfied.

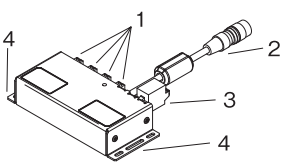
Part Names and Functions



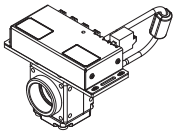
No.	Name	Description
1	Lighting connecting connector	Connects to the LED lighting.
2	Camera connecting cable	Connects to the extension connector of the camera.
3	24 V external power supply input terminal block *	Connect a 24-VDC power supply if the total power consumption of the Lightings exceeds 7.5 W.
4	Mounting hole for fixing screw	Holes to mount the screws to secure the Lighting Controller to a mounting plate or device.

* To wire the terminal block, connect a applicable cord (AWG12-26 with a 10 mm margin for work).

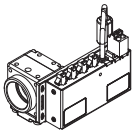
Mounting the Controller to the Camera

The Lighting Controller can be mounted to the Camera using the provided camera mount plate. Mounting directions are: (1) Top/Bottom mount, (2) Right side mount, (3) Left side mount.

(1) Top/Bottom mount



(2) Right side mount



(3) Left side mount

Analog Lighting Controller for FLV Series

FLV-ATC Series

Stationary Lighting Controller

Product Features

- Stationary type suitable for separate installation when no space near the Camera.
- Light emission trigger can be input directly even without Vision Sensor.

Ordering Information

Applicable Light	Model	Number of Channels	Power Supply Voltage	Maximun Lighting power	Luminance Control Method
For Standard Light *1	**FLV-ATC21024 *2**	2	100 to 240 VAC, 50/60 Hz	40 W max.	Analog
	FLV-ATC41024 *2	4			
For Spot Light	**FLV-ATC10405 *2**	1		3 W max.	
	FLV-ATC40405 *2	4		12 W max.	
For Line Light	**FLV-ATC26024-100V *2**	2	100 to 120 VAC, 50/60 Hz	240 W max.	
	FLV-ATC26024-200V	2	200 to 240 VAC, 50/60 Hz		

*1. Standard Light means all FLV-series Lights excluding the FLV-EP-series Spot Lights and the FLV-LN-series Line Lights.
*2. For AC power cords: An A-type plug is standard. C-type and O-type plugs are also available. (Add “-C” or “-O” to the end of the model number.)

Plug type	A	C	O
Rated voltage	125 V	240 V	240 V
Standard	PSE	CEE	CCC

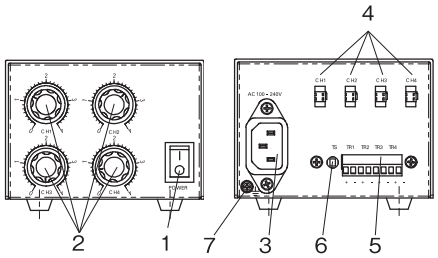
AC Power Cords with A-type Plugs

⚠ WARNING

The cable included in this packege can be applied only to AC 100V commercial power in Japan. You can not use it in the country outside Japan.
Please never use it on the voltage beyond AC100V.
It becomes a cause of ignition, generation of heat, and failure.

Lighting Controller for Standard Light FLV-ATC21024/-ATC41024

Part Names and Functions



No.	Name	Description
1	Main power supply	Starts up the Controller when it is turned ON.
2	Lighting adjustment volume	Rotating the volume clockwise increases the emission intensity or counterclockwise decreases it.
3	AC power supply input connector	A terminal to supply AC power. Connect the provided AC input cable.
4	Lighting connector	Connects an LED lights.
5	Trigger input terminal block	A terminal block for lighting illumination trigger input from outside to each lighting.
6	Lighting mode switching button	Lighting mode switch button is ON (The button is pushed.): Short-circuiting (+) and (-) of TR1 to TR4 respectively makes the trigger input status ON, turning the light ON. Releasing (+) and (-) makes the status OFF, turning the light OFF.
		Lighting mode switch button is OFF (The button is not pushed.): Short-circuit (+) and (-) of TR1 to TR4 respectively makes the trigger input status OFF, turning the light OFF. Releasing (+) and (-) makes the status ON, turning the light ON.
7	Frame ground terminal	A terminal for frame ground. Connect the ground line.

Specifications

ItemModel	FLV-ATC21024-□ *1	FLV-ATC41024-□ *1
Number of connectable lightings	1	4
Applicable light	FLV series (FLV-EP series and FLV-LN series are excluded.)	
Power supply voltage *2	100 to 240 VAC, 50/60 Hz	
Current consumption	1 A max.	
Electricity of connectable lighting	2ch total 40 W max. 30 W max. for 1ch	4ch total 40 W max. 30 W max. for 1ch
Drive method	Constant voltage method	
Lighting method	Trigger lighting, Continuous lighting	
Intensity control method	Voltage light adjustment: 14.0 to 24.0 V	
Trigger lighting	Lighting in synchronization with input from the trigger input terminal	
Trigger lighting delay time	T_on: 100 µs max.	
External interface	Trigger input terminal block	
Dielectric strength	1500 VAC 50/60 Hz 1 min	
Insulation resistance	20 MΩ (500 VDC)	
Ambient temperature	Operating: 0 to 50°C, Storage: -15 to 60°C (with no icing or condensation)	
Ambient humidity	Operating/storage: 35% to 85% (with no condensation)	
Degree of protection	IP20 (IEC60529)	
Vibration resistance (destructive)	10 to 150 Hz, (0.2 mm double amplitude) 80 min each in X, Y, and Z directions	
Shock resistance (destructive)	150 m/s² 3 times each in 6 directions (up/down, left/right, forward/backward)	
Materials	Case: Aluminum	
Weight	Approx. 800 g	
Accessories	Instruction sheet, AC input cable *1	
Applicable standards	EN61326-1 *3	

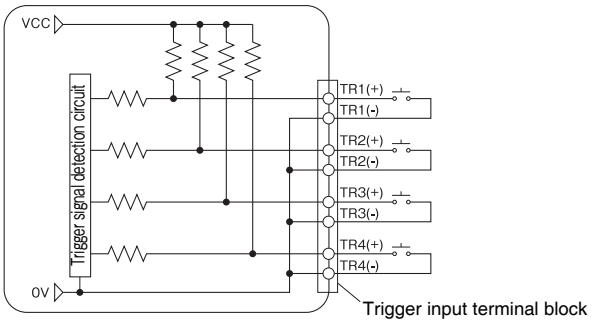
*1. The suffixed symbol of the model name means the plug type of the accessory cable. A model name with no suffix means type A.
*2. This product is the exclusive use for apparatus inclusion in the industrial machine field.
This product cannot be used for the connection to electric power equipment, such as a common residence, store, and small establishment, because of nonconformity with to Electrical Appliance and Material Safety Law (PSE).
*3. Electromagnetic environment: Industrial electromagnetic environment (EN/IEC 61326-1 Table 2)
Also, the following condition is applied to the immunity test of this product.
There are case that Lighting brightness fluctuate Max 10%.

Analog Lighting Controller for FLV Series FLV-ATC Series

Connecting to External Trigger Input Terminal Block

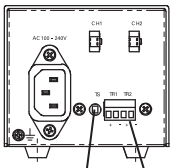
• Connection of this terminal block is not required if lighting illumination trigger input from outside is not used.

<Connection of trigger input terminal block>



* Current flowing through the short circuit is less than 2 mA.

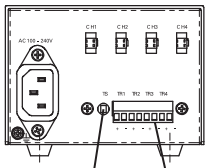
●FLV-ATC21024-□



Lighting mode switch button

Trigger input terminal block CH1 to CH2

●FLV-ATC41024-□



Lighting mode switch button

Trigger input terminal block CH1 to CH4

Lighting mode switch button is ON (The button is pushed.)

Short-circuiting (+) and (-) of TR1 to TR4 respectively makes the trigger input status ON, turning the light ON. Releasing (+) and (-) makes the status OFF, turning the light OFF.

Lighting mode switch button is OFF (The button is not pushed.)

Short-circuit (+) and (-) of TR1 to TR4 respectively makes the trigger input status OFF, turning the light OFF. Releasing (+) and (-) makes the status ON, turning the light ON.

[Important]

Make sure that excessive force is not imposed on the wire and terminal block.

Do not install the product in which loads are constantly applied to the terminal block such as the wire being under tension.

When wiring the terminal block, use an applicable cable (AWG 14 to 24, tip processing length: 7 mm).

Bar Light
FL-BR Series

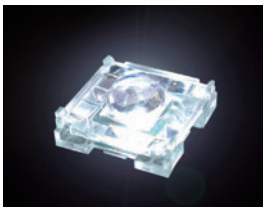
The highest level* of brightness in the industry.
This series is structured for adaptable wiring and mounting.

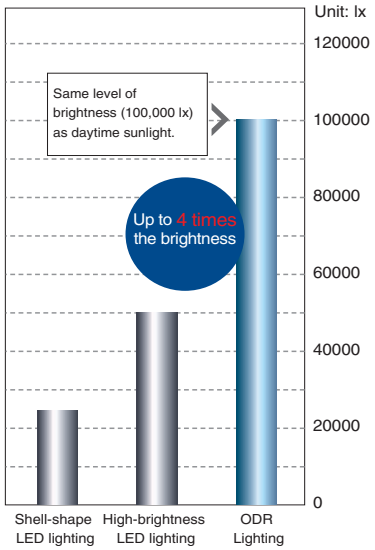
* Based on OMRON testing in November 2010.

Product Features

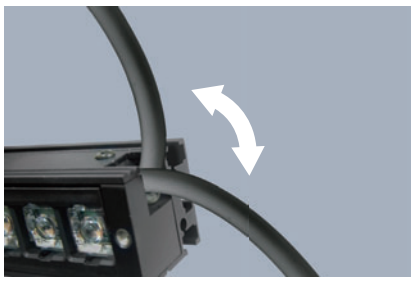
- High-brightness ODR lighting beyond the limitations of LEDs.
- Stable inspection even for high-speed applications.
- Bright even through a polarizing filter.
- Easy wiring, mounting, and adjustment.

ODR Optical Double Reflection



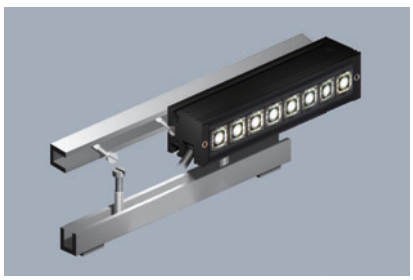


Wiring

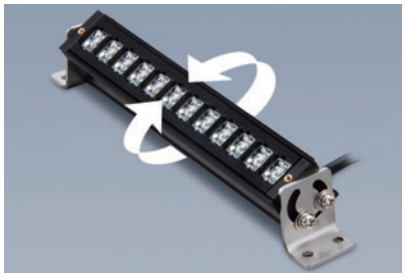


The cable can extend from either direction, allowing for horizontal or vertical wiring layouts on the mounting surface.

Mounting and Adjustment

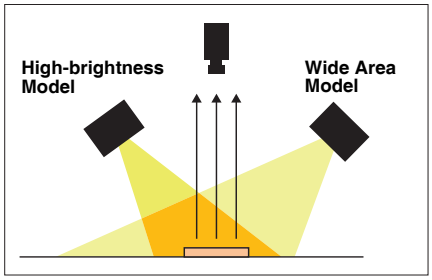


The light is structured for mounting with nuts to an arm on the back or side surfaces.
Minute changes in the position can be achieved by sliding the light.



Specialized mounting brackets enable mounting at a flexible angle.

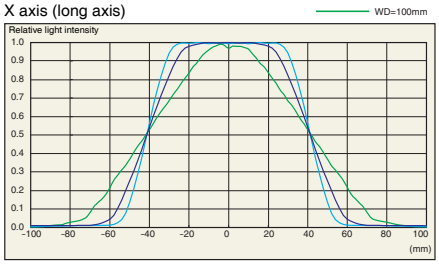
Illumination Structure



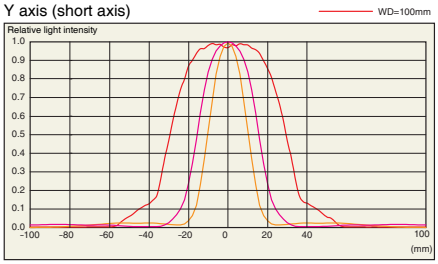
Lighting Intensity Distribution Characteristics

High-brightness Model (FL-BR9120W-H)

X axis (long axis)

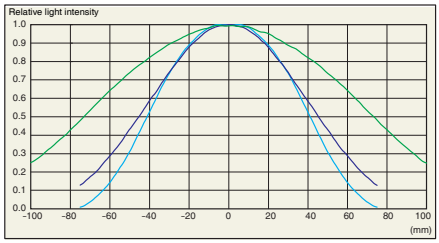


Y axis (short axis)

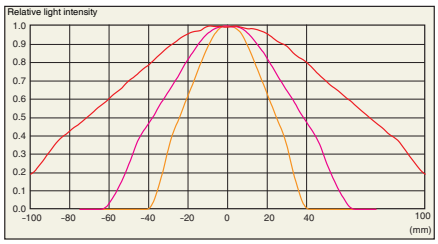


Wide Area Model (FL-BR9120W)

X axis (long axis)



Y axis (short axis)



Applications

Standard Lighitng

It is difficult to read characters with low contrast.

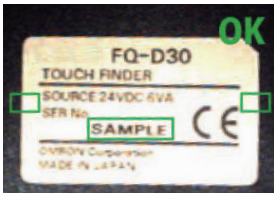
FL Series

Sharp images are created of both two-dimensional codes and characters.

Standard Lighitng

Inspection is not possible because of workpiece blurring or a lack of brightness.

FL Series



Complete extraction of edges and characters.

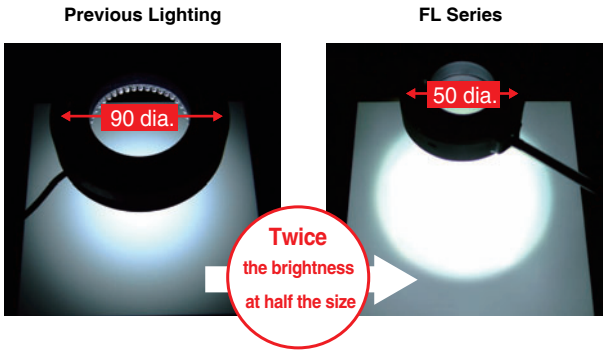
FL-DR Series

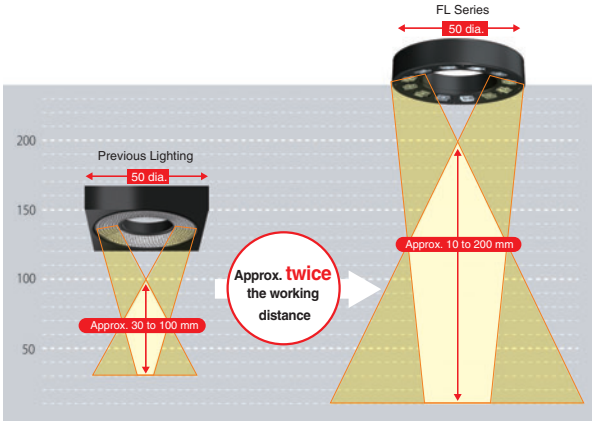
Clear Images with Industry's Best Level* of Brightness and Illumination over a Wide Field of View

*Based on OMRON testing in November 2010.

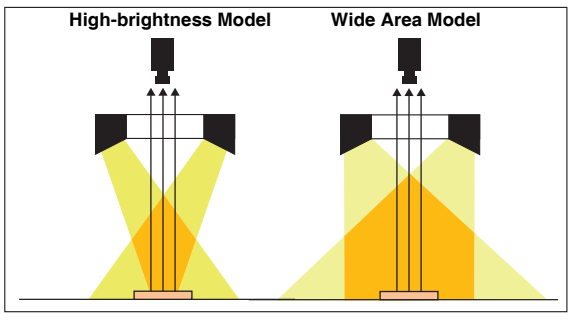
Product Features

- High brightness in a small package.
- Wide range of working distance.



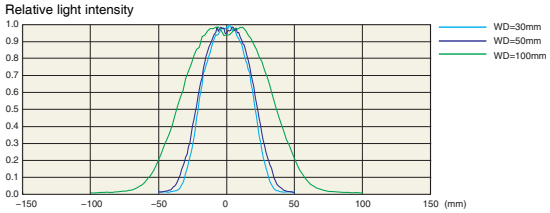


Illumination Structure

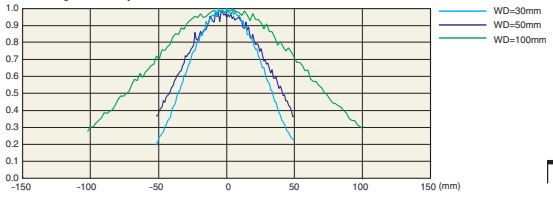


Lighting Intensity Distribution Characteristics

High-brightness Model (FL-DR50W-H)



Wide Area Model (FL-DR50W)



Direct Ring Light FL-DR Series

Applications

Previous Lighting

Faster lines make it necessary to increase shutter speeds, but then the clarity of workpiece images decreases.

FL-series

More than sufficient brightness is provided for high-speed lines.

Previous Lighting

It was necessary to create different inspection standards for each section.

FL-series

With uniform lighting from corner to corner, it is possible to inspect.

Camera-mount Lighting Controller for FL Series

FL-TCC Series

**Camera-mount Compact
Lighting Controller Which Requires
No Power Supply Nor Lighting Control**

Product Features

- No separate power supply is required because the power is supplied from the Camera.
- Light is emitted when a trigger signal is received from the Camera.
- Simple connection between the Camera and the Lighting with a single cable

Ordering Information

Item	Model	Weight
Lighting Controller	**FL-TCC1**	Approx. 110 g
Camera Mounting Spacer	**FL-TCC1-XSP**	Approx. 10 g
Camera Mounting Attachment	**FL-TCC1-XAT**	Approx. 20 g

Specifications

●Lighting Controller

Product type		Lighting Controller
Model		FL-TCC1
Input voltage		Supplied from applicable camera.
Applicable camera		FH-S/SC/S02/SC02/S04/SC04, FZ-S/SC/S2M/SC2M/S5M2/SC5M2/SH/SHC/SF/SFC/SP/SPC, FQ-MS series and others.
Applicable controller		FH series, FZ5 series, FZ4 series and others.
Power consumption		10 W, 0.9 A max. (including the lighting section)
Number of output channels		1
Applicable lighting		FL-☐ series
Luminance control method	Functions	PWM frequency: 100 kHz, Light adjustment: 255 levels (set with the Controller)
	Trigger lighting	Lighting ON synchronized with trigger input timing from the Controller. (Auto setting in accordance with the shutter speed.)
	Trigger lighting delay time	Ton: 30 µs max. (Trigger ready µs) Toff: 10 µs max.
External interface		Dedicated communication connector
Ambient temperature		Operating: 0 to 50°C, Storage: -15 to 60°C (with no icing or condensation)
Ambient humidity		Operating/storage: 35% to 85% (with no condensation)
Vibration resistance		10 to 55 Hz, (0.7 mm double amplitude) 80 min each in X, Y, and Z directions
Shock resistance		150 m/s² 3 times each in 6 directions (up/down, left/right, forward/backward)
Materials		Case: SECC, Cable: PVC
Degree of protection		IP20 (IEC60529)
Weight		Approx. 110 g
Accessories		Instruction sheet, Insulation sheet, Mounting screw (M2 × 6 mm) × 4
Applicable standards		EN61326-1 *

*. Electromagnetic environment: Industrial electromagnetic environment (EN/IEC 61326-1 Table 2)
Also, the following condition is applied to the immunity test of this product.
There are case that Lighting brightness fluctuate Max 10%.

Digital Lighting Controller for FL series

FL-STC Series

Small body is combined with the long cable at 25 m. Install in essentially any location.

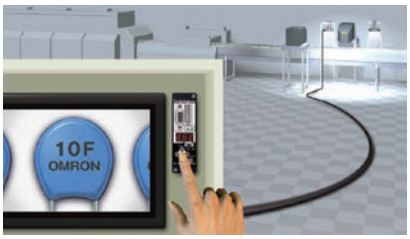
Product Features

●Easy Control and Adjustment of the Lighting

With a compact design small enough to fit in the palm of your hand, the Controller can be built into the control panel or in the gap between production lines.

By using the longest lighting cable in the industry (25 m), the Controller can be installed along with the image processing monitor in a variety of locations. It is possible to adjust the lighting while looking at the screen.

Connect to a Remote Control Panel



Mount to a DIN Rail underneath the Line or in the Gap between Tables

Lighting Control without Programming

This enables light emission synchronized with the camera using essentially any trigger, such as a photoelectric sensor.

The Controller can be connected to an image processing device to control lighting without any programming on a PLC.

[Control Output]
- PNP/NPN models
- Power source: 24 V

[Lighting Emission Controls]
- Lighting triggers can be used individually for each channel.
- Lighting delay and lighting time can be controlled.

Intuitive Digital Light Controls

Digital adjustment of light emission makes it easy to reproduce the lighting environment after line switchovers.

The quantity of light is displayed digitally in 400 levels. Adjust the light in fine detail.

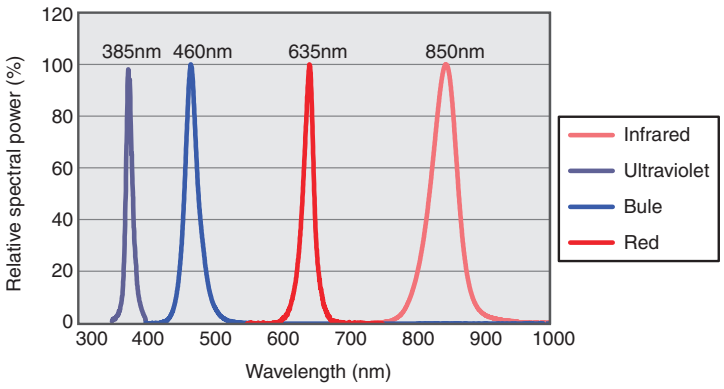
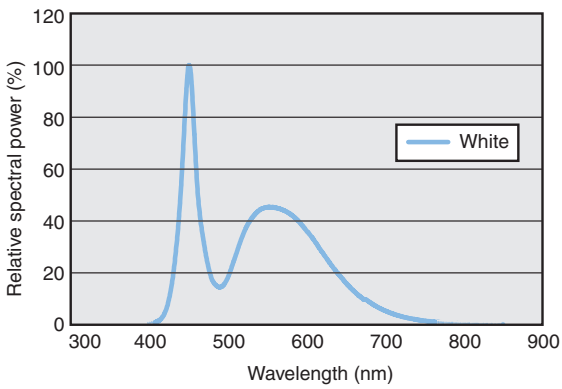
Typical LED Spectral Distributions

Typical spectral distributions and peak wavelengths of each LED color are shown in the diagrams below.





Standard Lens for C-mount cameras

SV-V Series

- Standard CCTV lens.
- Lineup of 11 models with focal lengths ranging from 3.5 to 100 mm.
- Lock screws for focus and iris.
- More robust structure designed for machine vision.
- Lower distortion and higher resolution than previous CCTV lenses.

High-resolution Telecentric Lens for C-mount cameras

VS-TCH Series

- High-resolution telecentric lens for megapixel camera.
- Broad product selection.

  Available in two different working distances, 65 or 110 mm, to fit installation spaces.
  Comes in two shapes: straight and coaxial for coaxial lights.
  Five optical magnifications, 0.5x, 1.0x, 1.5x, 2.0x, and 4.0x, are available to cover a wide range of applications.
- Low-distortion design.

  High quality images can be obtained from any part of the area.
  Ideal for high-precision alignment.

*1 The working distance is the distance from the end of the lens to the sensor.
*2 The depth of field is calculated using a permissible circle of confusion diameter of 0.04 mm.
*3 The resolution is calculated using a wavelength of 550 nm.
Note: 1. Fixing the lens or other reinforcement may be required depending on the installation angle or operating environment (vibration/shock). When fixing the lens, insulate the lens from the fixture.
2. The above specifications are values calculated from the optical design and can vary depending on installation conditions.

Applications

Detection of alignment marks

Combining the FLV-EP08-series Spot Light and Camera-mount Lighting Controller saves space and simplifies wiring.

Illustration of Combination of Spot Light and Controller

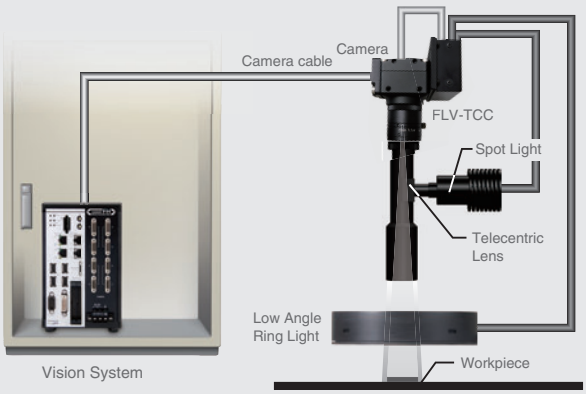

Illustration of Alignment Mark Detection

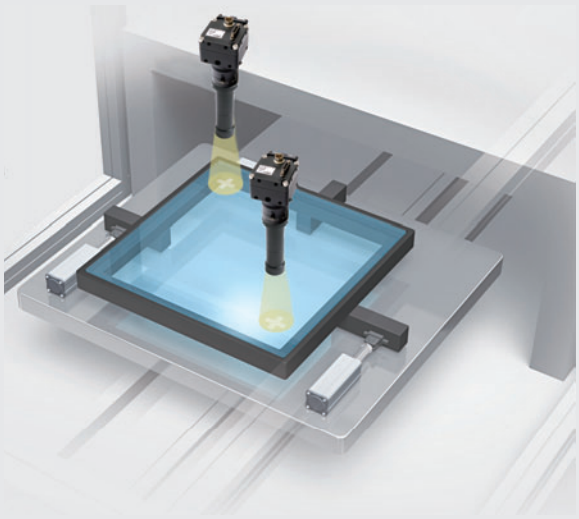

Only the camera cable is connected from control panel

VS-MC Series

- Lineup of 7 models with focal lengths ranging from 15 to 75 mm.
- A lock ring locking the surface and the improved design of internal structure increase resistance to vibration in comparison to the previous model with a lock screw locking a point.
- This enables application in environments where the point-locked lens is moved under the effects of ambient vibration.
- Install in narrow space without a lock screw.

Standard Lens for M42-mount cameras

VS-L/M42-10 Series

- Wide variety of lenses with focal lengths ranging from 18 to 100 mm.
- Hexagon socket head cap screws for focus and aperture lock screws can be tightened more than finger tight. The ensures vibration resistance even when large diameter lenses are used.

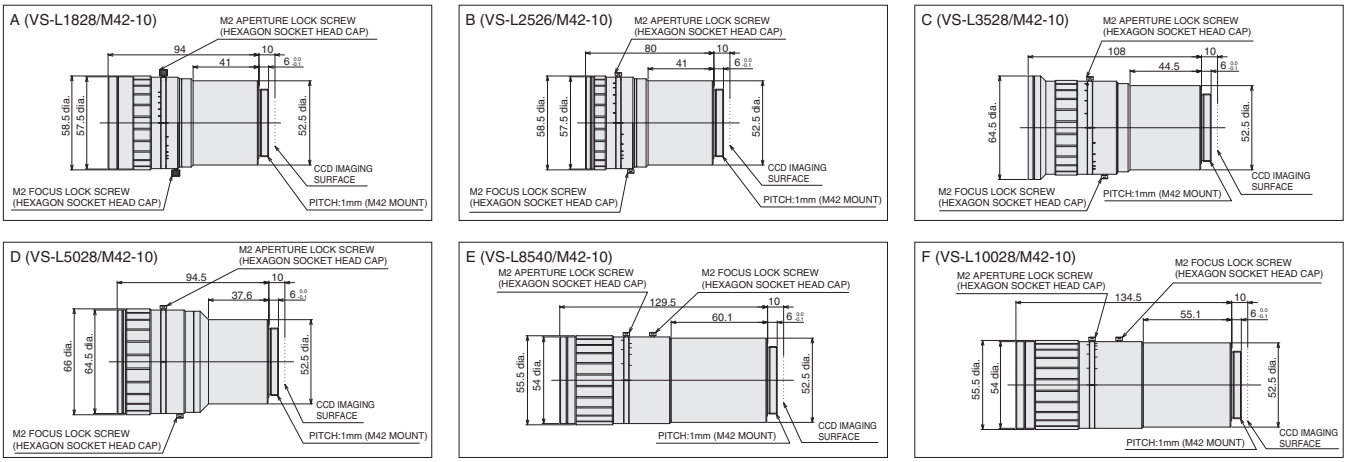
(Unit:mm)



Specifications

Ambient temperature	Operating: −10 to 50°C, Storage: −20 to 70°C (with no icing or condensation)
Ambient humidity	Operating: 0% to 90%, Storage: 0% to 70% (with no condensation)

Optical Chart

Refer to page 75.

Lens Option

Polarizing Filter SV-PL Series

- Prevents diffused reflection.
- Available for lenses for C-mount cameras.

Ordering Information

Item	Size	Anti-rotation mechanism: Provided		Anti-rotation mechanism: Not provided	
		Model	Weight (g)	Model	Weight (g)

Extension Tubes

Ordering Information

Lenses	Model	Contents
For C-mount Lens	**3Z4S-LE SV-EXR**	7-piece set *1,*2 (40 mm, 20 mm,10 mm, 5 mm, 2mm, 1 mm, 0.5 mm) Maximum outer diameter: 30 mm dia.
For M42-mount Cameras	**3Z4S-LE VS-EXR/M42**	Set of 5 tubes *1 (20 mm, 10 mm, 8 mm, 2 mm, and 1 mm) Maximum outer diameter: 47.5 mm dia.
For Small Digital CCD Cameras	**FZ-LESR**	Set of 3 tubes (15 mm, 10 mm, 5 mm) Maximum outer diameter: 12 mm dia.

*1 Do not use the 0.5-mm, 1.0-mm, and 2.0-mm Extension Tubes attached to each other. Since these Extension Tubes are placed over the threaded section of the Lens or other Extension Tube, the connection may loosen when more than one 0.5-mm, 1.0-mm or 2.0-mm Extension Tube are used together.
Reinforcement is required to protect against vibration when Extension Tubes exceeding 30 mm are used. When using the Extension Tube, check it on the actual device before using it.

*2 These Extension Tubes are also available individually. Order using the following model number, replacing the box with the desired length: 3Z4SLE SV-EXR□. (0.5, 1, 2, 5, 10, 15, 20, 25, 30, 40, 50 mm)

Rear Converter Lens

Ordering Information

Model
3Z4S-LE SV-1.5X *1
3Z4S-LE SV-2.0X *2

*1 In the following lenses, it is necessary to use it together with the extension tubes of 5 mm or more.
SV-0614H, SV-0814H, SV-1214H, SV-2514H, SV-0614V, SV-0813V

*2 In the following lenses, it is necessary to use it together with the extension tubes of 5 mm or more.
SV-0614H, SV-0814H, SV-1214H, SV-2514H, SV-0813V

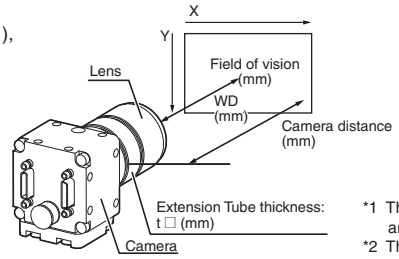
Optical Chart

Optical Chart

Meaning of Optical Chart

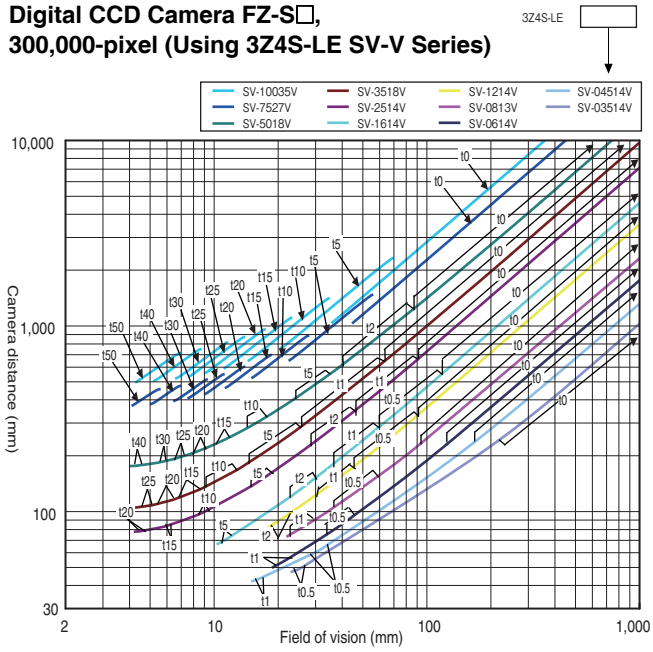
The X axis of the optical chart shows the field of vision (mm) (*1), and the Y axis of the optical chart shows the camera installation distance (mm) (*2).



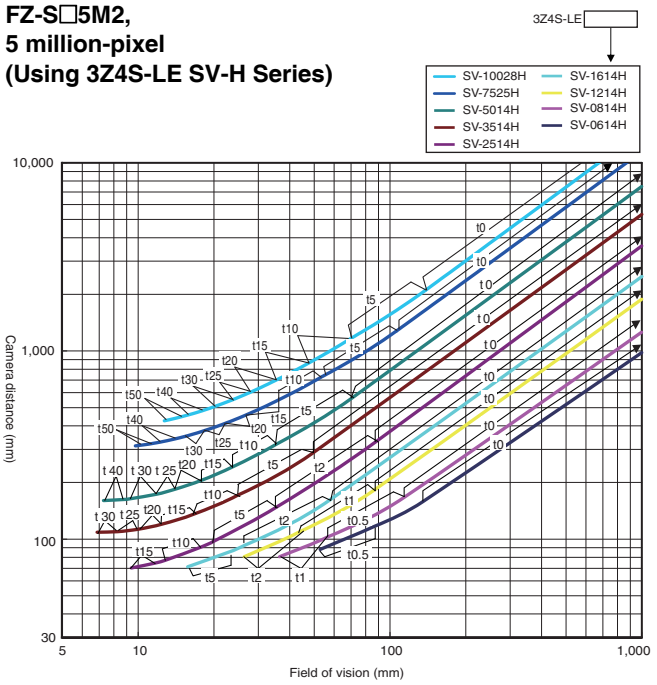
*1 The lengths of the fields of vision given in the optical charts are the lengths of the Y axis.
*2 The vertical axis represents WD for small cameras.

Normal Lenses

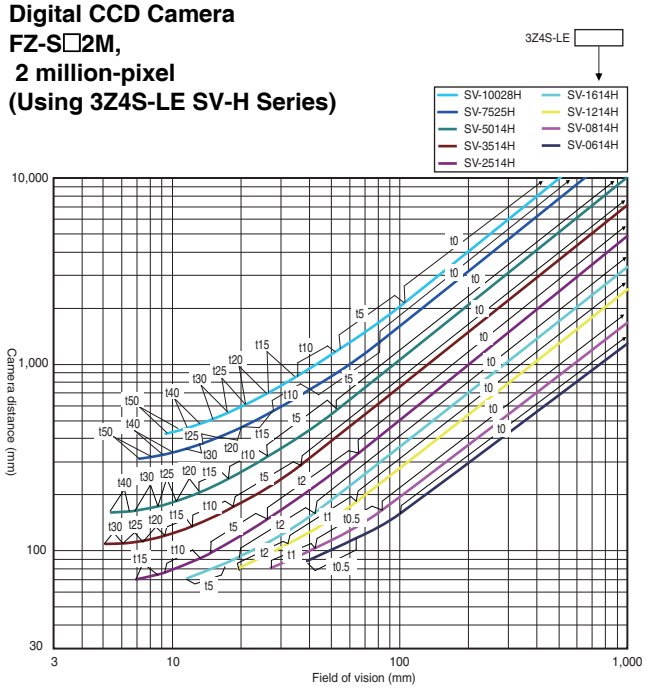
High-speed Digital CMOS Camera FH-S□, High-speed Digital CCD Camera FZ-SH□, Digital CCD Camera FZ-S□, 300,000-pixel (Using 3Z4S-LE SV-V Series)



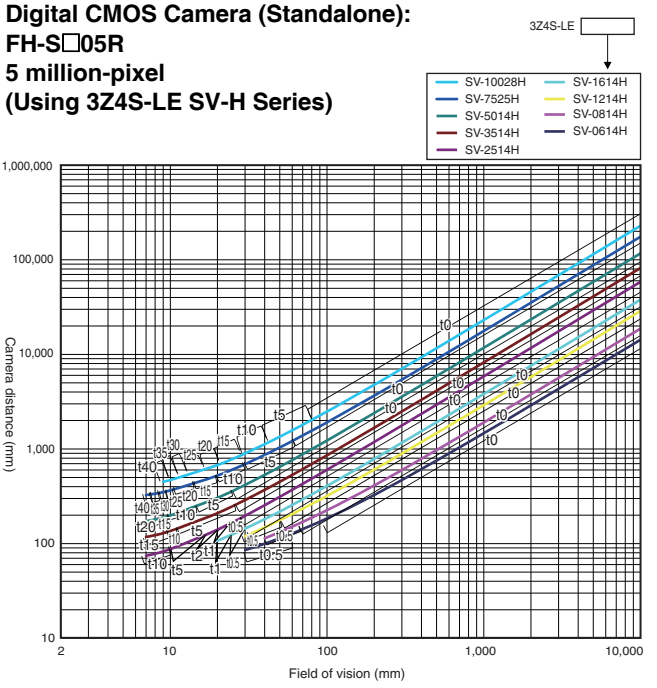
Digital CCD Camera FZ-S□5M2, 5 million-pixel (Using 3Z4S-LE SV-H Series)



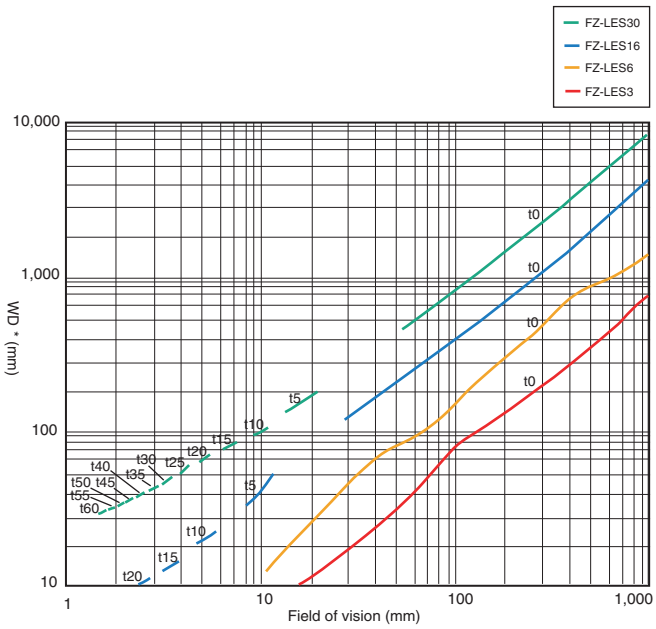
Digital CCD Camera FZ-S□2M, 2 million-pixel (Using 3Z4S-LE SV-H Series)



Digital CMOS Camera (Standalone): FH-S□05R 5 million-pixel (Using 3Z4S-LE SV-H Series)

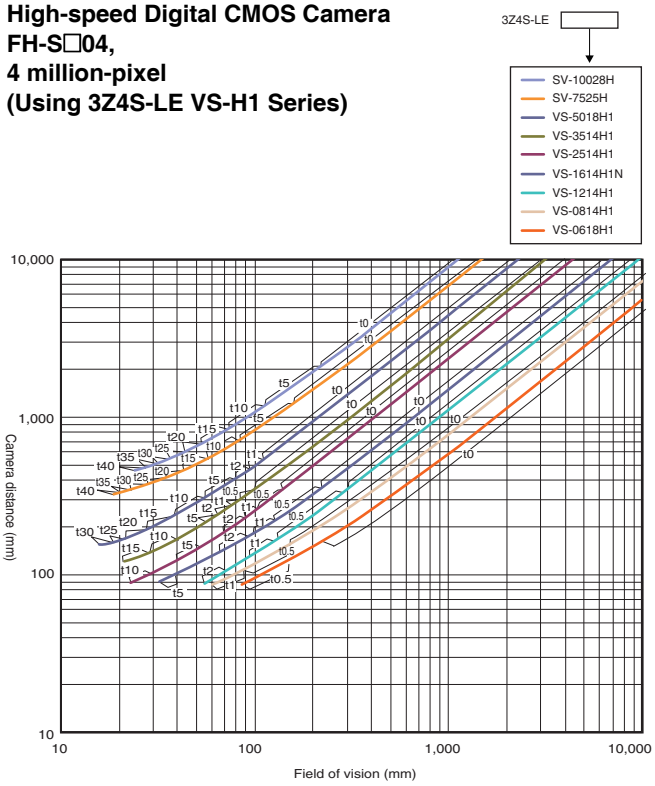


Small Digital CCD Cameras FZ-SF□, FZ-SP□, 300,000-pixel (Using FZ-LES Series)

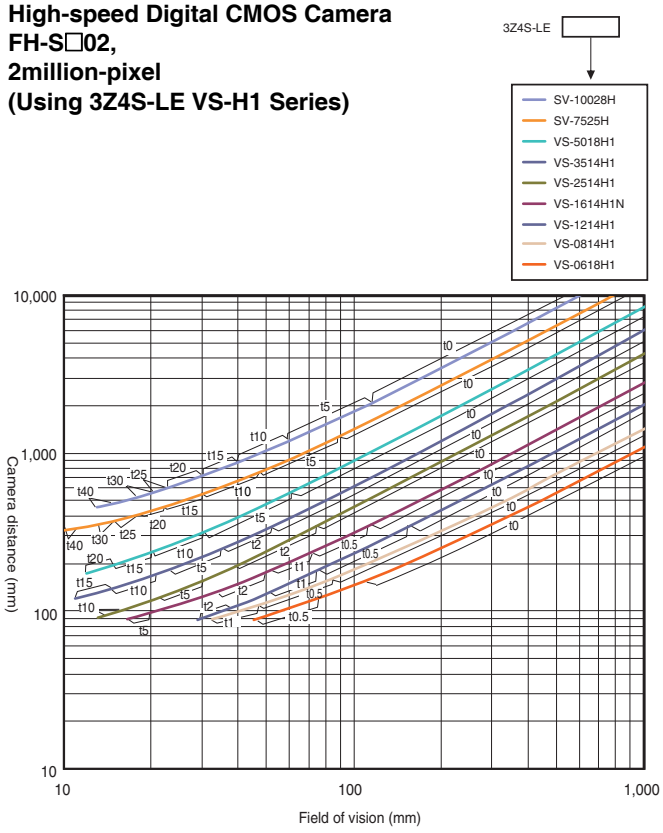


* The vertical axis represents WD, not installation distance.

High-speed Digital CMOS Camera FH-S□04, 4 million-pixel (Using 3Z4S-LE VS-H1 Series)



High-speed Digital CMOS Camera FH-S□02, 2million-pixel (Using 3Z4S-LE VS-H1 Series)



High-speed Digital CMOS Camera FH-S□12, 12 million-pixel (Using 3Z4S-LE VS-L/M42 Series)

Safety Precautions

Precautions on Safety

●Meaning of Signal Word

In order for the product to be used safely, the following indication is used in this catalog to draw your attention to the cautions. The cautions with the indication describe the important contents for safety.

⚠ WARNING	**Indicates a potentially hazardous situation which, if not avoided, will result in minor or moderate injury, or may result in serious injury or death. Additionally there may be significant property damage.**

●Meaning of Alert Symbol

	**Indicates general prohibitions for which there is no specific symbol.**

●Alert Statements

⚠ WARNING

This product is not designed or rated for ensuring safety of persons. Do not use it for such purposes. 

It may cause permanent damage to vision.
Do not look directly at the sun through the lens. 

Precautions for Safe Use

The following points are important to ensure safety, so make sure that they are strictly observed.

1. Installation and Storage Sites

Do not install and store the product in locations subjected to the following conditions:

- Ambient temperature outside the rating
- Rapid temperature fluctuations (causing condensation)
- Presence of corrosive or flammable gases
- Presence of dust, salt, or iron particles
- Direct vibration or shock
- Strong ambient light (such as other laser beams or light from arc-welding machines)
- Direct sunlight or near heaters
- Water, oil, or chemical fumes or spray
- Near high-voltage equipment or power equipment

2. Installation

- Make sure to tighten all installation screws securely

3. Others

- Do not attempt to dismantle, repair, or modify the product.
- Do not drop, impose excessive vibration or shock on the product.
- If you notice an abnormal condition, immediately stop using the product and consult your OMRON representative.
- Be sure to dispose of the product as industrial waste.

Precautions for Correct Use

Observe the following precautions to prevent failure to operate, malfunctions, or undesirable effects on product performance.

1. Maintenance

- Clean the lens with a lens-cleaning cloth or air brush.
- Avoid blowing off foreign matter with your breath. Do not use thinner, benzene, acetone, or kerosene.

2. Using with Product from Other Manufacturer

- Refer to the manual of the product from other manufacturer for installation and replacement.

3. Others

- After removing the lens from the camera, do not leave it in a place exposed to direct sunlight. Failure to do so may cause a fire.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
